To ensure that you have all the information you need to make a decision, this *Investment Guide* should be read in conjunction with the *Brochure, Key Features* and *Terms and Conditions*.

# A world of investment choice

---

To help you review the investment options available the following sections provide you with some of the key information you'll require to help you make your choice.

The "Fund range overview" section lists each of the funds by sector and provides the following information:

- currency
- ISIN code
- risk rating
- launch date
- domicile
- annual management charge (AMC %)
- if the fund is subject to any performance fee (Perf fee %)
- if it is a multi-manager fund
- if the fund is classed as socially conscious

A socially conscious fund is one which invests in companies that operate ethically, provides social benefits or is sensitive to the environment.

The "Fund objectives" summarises the aim of each fund or financial goal it will pursue.

The information supplied within these sections has been sourced from Morningstar Direct and selected third parties and is correct as at 17 November 2017. Whilst great care has been taken to ensure that this information is correct, RL360° cannot accept responsibility for its content or interpretation.

Prior to investment in any fund you should read the relevant Prospectus, Factsheet and Key Investor Information Document (KIID) to make yourself aware of the charges and risks that apply to the fund. These can be obtained from your financial adviser, the fund manager's own website or from the product Fund Centre at [www.rl360.com](http://www.rl360.com).

RL360° does not provide investment advice and we recommend that you consult a suitably qualified financial adviser before making any investment decisions.

Remember, once you have made your decision, you can still switch between funds at any time (currently free of charge).

Please also note that all the funds are available at the 'net asset value' (NAV), which means there are no initial fund charges. This *Fund Guide* does not detail any product specific charges. For further details please refer to the relevant product literature.

Please be aware that investment returns may fluctuate and are not guaranteed. The price of units may fall as well as rise as a result of market and currency fluctuations and you may get back less than you paid in.

# Fund risk ratings

To provide you with additional assistance in making your fund selection, as well as separating the funds into different asset classes or sectors, where possible each fund displays a synthetic risk and reward rating of between 1 and 7 in the overview section. The risk rating aims to provide you with an indication of the risk versus potential reward of each fund in the available range.

## How is the risk rating determined?

The ratings provided are those as published in each fund's Key Investor Information Document (KIID) which we have sourced from either Morningstar Direct or from the fund managers KIID (correct as at 17 November 2017). Please note that KIID's are only produced for funds with UCITS\* status, therefore if the fund does not have UCITS status a risk rating will not be available.

The rating is calculated based upon the historic volatility (see below) of each individual fund over a 5 year period. So in simple terms, funds with very low volatility will have a 1 or 2 rating. These funds generally have a more cautious approach with little or no exposure to equity markets, and usually invest in cash or money market securities. You should be aware that for funds considered lower risk, the potential for reward will be lower, as these funds are likely to yield much lower returns than funds with a high equity exposure.

Funds with high volatility will have a 6 or 7 rating. These funds tend to have a high exposure to less developed, emerging equity markets or use high risk alternative assets within their investment strategy. Over the long term, exposure to equity markets could provide the opportunity for higher investment returns however, it also brings a much higher degree of investment risk. Although investment gains could be made when markets are buoyant, losses can quickly occur when markets take a downturn. You must therefore be prepared not only for the potential of higher returns, but also the potential for higher losses by investing in these types of funds.

## What is volatility?

Volatility is a measure of variance of a financial instrument's price over a particular time period, which means the greater the movement in fund prices, the more volatile the fund's performance is.

Funds with high volatility are generally associated with higher risk but potentially higher reward. Funds with low volatility are generally associated with lower risk, but lower potential reward.

## Synthetic risk and reward indicator scale

The scale demonstrates where a fund ranks in terms of its potential risk versus return.

In all cases there is no guarantee that a fund's risk reward rating will remain the same and may be re-categorised in the future. Please note that a low rated fund does not mean it is risk-free.

Although the rating is designed to give an indication of the risk versus reward potential it should not be used in isolation as your personal circumstances and attitude to risk need to be taken into consideration. There could also be other factors, such as investment term, which should be considered so we would always recommend that you speak to your financial adviser for assistance when making your fund choice.

For the most up to date risk rating always refer to the fund manager's published KIID.

# Monitoring fund performance

---

Your premiums buy units in the funds you choose, so an important part of maintaining the growth in your policy is how well the investment choices in your policy perform. Some funds perform better than others during the ups and downs of market conditions. So to help you monitor the investments in your policy we created the Fund Centre.

With the aid of the Fund Centre you can access daily price movements across the fund range, see how funds have performed over different time periods and view one or more funds in a chart. You can investigate the breakdown of a fund such as its top 10 holdings, its asset allocation or the investment style adopted by the fund manager. Using the Fund Centre you can easily monitor your funds and research new fund choices for future investment.

You can also access a range of documents each fund house publishes that you should read prior to investing in a fund. In the *Documents* tab in Fund Centre you will find the:

- **Prospectus** – a legal document that details the investment objective, policy and strategy of a fund or group of funds offered. This includes all the important and financial details that should be disclosed about a fund to enable an investor to assess all the risks associated with the fund prior to investment. This detailed document is only updated when a significant change happens to the fund range
- **Factsheet** – a monthly document issued by the fund manager that provides a fund's objective, its latest performance, its top 5 or 10 holdings and its charges
- **Key Investor Information Document (KIID)** – a simplified version of the Prospectus, usually 2 or 3 pages long, updated at least once a year detailing some of the key elements of the fund such as its objective, its risks, its charges and past performance.

Charges applied by funds such as the Annual Management Charge (AMC), Ongoing Charge Fee (OCF) and in some circumstances a Performance Fee, are reflected in the published unit prices. This means each unit price shown in your policy is the value after these charges have been deducted. You will not see fund charges deducted separately from your policy, only our product related charges.

One of the features of the fund range is that Initial Entry Charges (normally applied when investing in a fund directly) do not apply when you purchase units in a fund. Therefore all unit purchases are made free of any Initial Entry Charges.

To access the Fund Centre go to [www.rl360.com](http://www.rl360.com), click on 360° Public then Products. For Oracle click on the *Oracle Fund Centre*. For Paragon click on the *Paragon Fund Centre*. For Quantum click on the *Quantum Fund Centre*.

Note that past performance is not a guide to future performance. Investment returns may fluctuate and are not guaranteed. Your policy will be subject to foreign exchange exposure where you select funds in a currency other than your policy denomination.

## Fund range overview

The range of funds available are shown below in their respective sector, along with some key information for the fund.

You can switch between funds at any time, subject to minimum investment levels. Further details can be found in the *Key Features*. This service is currently free of charge.

Prior to investment in any fund you should read the relevant Prospectus, Factsheet and Key Investor Information Document (KIID) to make yourself aware of the charges and risks that apply to the fund. These can be obtained from your financial adviser, the fund manager's own website or from the product Fund Centre at [www.r1360.com](http://www.r1360.com).

### Funds

Investment can be made into any of the funds available in the range regardless of the denominated policy currency. It is important to know that unit prices reflect the value of the underlying assets of the funds and so can go down as well as up. Past performance is not indicative of future performance. Where a fund invests in overseas securities, the unit prices may also rise and fall purely on account of exchange rate fluctuations.

RL360 Insurance Company Limited is not responsible for, and will not compensate policyholders in relation to, the performance of their underlying funds. For details of all charges that may affect the individual funds please refer to the specific fund manager's literature.
