Investment choice

At RL360°, we understand that choosing the right investment funds is crucial to help you maintain your chosen level of protection benefits.

The “Fund range overview” sections list each of the funds by sector and provides the following information:

- currency
- ISIN code
- risk rating
- launch date
- domicile
- annual management charge (AMC %)
- if the fund is subject to any performance fee (Perf fee %)
- if it is a fund of funds
- if the fund is classed as socially conscious

A socially conscious fund is one which invests in companies that operate ethically, provides social benefits or is sensitive to the environment.

The “Fund objectives” summarises the aim of each fund or financial goal it will pursue.

The information supplied within these sections has been sourced from Morningstar Direct and selected third parties and is correct as at 12 March 2018. Whilst great care has been taken to ensure that this information is correct, RL360° cannot accept responsibility for its content or interpretation.

Prior to investment in any fund you should read the relevant Prospectus, Factsheet and Key Investor Information Document (KIID) to make yourself aware of the charges and risks that apply to the fund. These can be obtained from your financial adviser, the fund manager’s own website or from the product Fund Centre at www.rl360.com/fundcentres.

RL360° does not provide investment advice and we recommend that you consult a suitably qualified financial adviser before making any investment decisions.

You can switch between any of the funds during the lifetime of your policy, free of any dealing charge, subject to minimum investment levels. Further details can be found in the product *Key Features*. This *Fund Guide* does not detail any product specific charges. For further details please refer to the relevant product literature.

Please be aware that investment returns may fluctuate and are not guaranteed. The price of units may fall as well as rise as a result of market and currency fluctuations and you may get back less than you paid in.

Balancing risk

To support your chosen protection benefits throughout the lifetime of your policy, it’s vitally important you understand the risk profile of the funds you choose to invest into.

The investment performance of your policy plays an important role in ensuring that your benefits can be sustained for life. If your investment return is less than expected or your chosen investment funds suffer large drops in value then your policy value may become insufficient to pay for your benefits and cover will cease. In order to maintain your policy you may have to reduce your level of benefits, increase your regular premiums or pay in an additional lump sum to maintain the level of protection you require.

It is therefore important that you and your financial adviser consider the risk involved in your investment choice to ensure that it is appropriate for the needs of your policy.

Different investment choices have different levels of expected return but also different levels of risk involved. You should be sure to consult with your financial adviser when making any investment decisions.

Fund risk ratings

To provide you with additional assistance in making your fund selection, as well as separating the funds into different asset classes or sectors, where possible each fund displays a synthetic risk and reward rating of between 1 and 7 in the overview section. The risk rating aims to provide you with an indication of the risk versus potential reward of each fund in the available range.

How is the risk rating determined?

The ratings provided are those as published in each fund's Key Investor Information Document (KIID) which we have sourced from either Morningstar Direct or from the fund managers KIID (correct as at 12 March 2018). Please note that KIID's are only produced for funds with UCITS* status, therefore if the fund does not have UCITS status a risk rating will not be available.

The rating is calculated based upon the historic volatility (see below) of each individual fund over a 5 year period. So in simple terms, funds with very low volatility will have a 1 or 2 rating. These funds generally have a more cautious approach with little or no exposure to equity markets, and usually invest in cash or money market securities. You should be aware that for funds considered lower risk, the potential for reward will be lower, as these funds are likely to yield much lower returns than funds with a high equity exposure.

Funds with high volatility will have a 6 or 7 rating. These funds tend to have a high exposure to less developed, emerging equity markets or use high risk alternative assets within their investment strategy. Over the long term, exposure to equity markets could provide the opportunity for higher investment returns however, it also brings a much higher degree of investment risk. Although investment gains could be made when markets are buoyant, losses can quickly occur when markets take a downturn. You must therefore be prepared not only for the potential of higher returns, but also the potential for higher losses by investing in these types of funds.

What is volatility?

Volatility is a measure of variance of a financial instrument's price over a particular time period, which means the greater the movement in fund prices, the more volatile the fund's performance is.

Funds with high volatility are generally associated with higher risk but potentially higher reward. Funds with low volatility are generally associated with lower risk, but lower potential reward.

Synthetic risk and reward indicator scale

The scale demonstrates where a fund ranks in terms of its potential risk versus return.

In all cases there is no guarantee that a fund's risk reward rating will remain the same and may be re-categorised in the future. Please note that a low rated fund does not mean it is risk-free.

Although the rating is designed to give an indication of the risk versus reward potential it should not be used in isolation as your personal circumstances and attitude to risk need to be taken into consideration. There could also be other factors, such as investment term, which should be considered so we would always recommend that you speak to your financial adviser for assistance when making your fund choice.

For the most up to date risk rating always refer to the fund manager's published KIID.

* UCITS: Undertakings for Collective Investment in Transferable Securities are a set of European Union directives that aim to allow collective investment schemes to operate freely throughout the EU on the basis of a single authorisation from one member state.

Monitoring fund performance

Your premiums buy units in the funds you choose, so an important part of maintaining the benefits in your policy is how well the investment choices in your policy perform. Some funds perform better than others during the ups and downs of market conditions. So to help you monitor the investments in your policy we created the Fund Centre.

With the aid of the Fund Centre you can access daily price movements across the external fund range, see how funds have performed over different time periods and view one or more funds in a chart. You can investigate the breakdown of a fund such as its top 10 holdings, its asset allocation or the investment style adopted by the fund manager. Using the Fund Centre you can easily monitor your funds and research new fund choices for future investment.

You can also access a range of documents each fund house publishes that you should read prior to investing in a fund. In the *Documents* tab in Fund Centre you will find the:

- **Prospectus** – a legal document that details the investment objective, policy and strategy of a fund or group of funds offered. This includes all the important and financial details that should be disclosed about a fund to enable an investor to assess all the risks associated with the fund prior to investment. This detailed document is only updated when a significant change happens to the fund range
- **Factsheet** – a monthly document issued by the fund manager that provides a fund's objective, its latest performance, its top 5 or 10 holdings and its charges
- **Key Investor Information Document (KIID)** – a simplified version of the Prospectus, usually 2 or 3 pages long, updated at least once a year detailing some of the key elements of the fund such as its objective, its risks, its charges and past performance.

Charges applied by funds such as the Annual Management Charge (AMC), Ongoing Charge Fee (OCF) and in some circumstances a Performance Fee, are reflected in the published unit prices. This means each unit price shown in your policy is the value after these charges have been deducted. You will not see fund charges deducted separately from your policy, only our product related charges.

To access the Fund Centre go to www.rl360.com/fundcentres.

Note that past performance is not a guide to future performance. Investment returns may fluctuate and are not guaranteed. Your policy will be subject to foreign exchange exposure where you select funds in a currency other than your policy denomination.

Fund range overview for LifePlan

For Protected Lifestyle go to page 10

The range of funds available are shown below in their respective sector, along with some key information for the fund.

Prior to investment in any fund you should read the relevant Prospectus, Factsheet and Key Investor Information Document (KIID) to make yourself aware of the charges and

risks that apply to the fund. These can be obtained from your financial adviser, the fund manager's own website or from the product Fund Centre at www.rl360.com.

Please note that the LifePlan fund range is available at the 'net asset value' (NAV), which means there are no initial fund charges.

Performance fee (Perf fee %)

For some funds, their literature may state that a performance fee may become payable in the event of outperformance of a stipulated benchmark, hurdle rate or water mark.

The performance fee is payable in addition to the annual management fee and taken into account in the published unit prices. See the relevant fund prospectus for further details.

Fund range overview for Protected Lifestyle

For Lifeplan go to page 5

The range of funds available are shown below in their respective sector, along with some key information for the fund.

Prior to investment in any external fund you should read the relevant Prospectus, Factsheet and Key Investor Information Document (KIID) to make yourself aware of the charges and risks that apply to the fund. These can be obtained from

your financial adviser, the fund manager's own website or from the product Fund Centre at www.rl360.com.

Please note that for Protected Lifestyle a bid/offer spread of 2.5% applies to each fund, with the exception of the GBP/USD/EUR Cash Funds. This means you buy units at the offer price which are then valued in your policy at the bid price. The bid price is 2.5% less than the offer price. For the Cash Funds the bid and offer price will be the same.

Carmignac Patrimoine LP PLS

The fund aims to outperform its benchmark over a period exceeding 3 years. The investment policy takes into account the principle of risk spreading by means of the diversification of investments, with up to a maximum of 50% invested in international equities and between 50% and 100% invested in fixed income assets and/or variable rate government and/or corporate bonds and money market instruments. The average rating of the bonds held by the Fund shall be at least investment grade (rated at least BBB-/Baa3 by rating agencies). Fixed income products from emerging countries may not exceed 25% of net assets.

Fidelity Multi Asset Strategic LP PLS

The Fund aims to provide long-term capital growth through global exposure to a balance of lower and higher risk assets. The Fund will primarily invest in funds (including funds managed by Fidelity). The Fund may also invest directly into transferable securities, other collective investment schemes, money market instruments, cash and deposits and is also able to use derivatives for efficient portfolio management and investment purposes. Asset allocation exposure of the Fund will be actively managed and typical allocation will be as follows: 50% lower risk assets (such as debt instruments e.g. bonds and cash) and 50% higher risk assets (including equities, commodities and property securities). However, the Fund's allocation between lower risk and higher risk assets can be tactically adjusted within the following range in order to preserve capital or take advantage of market opportunities: 30-70% lower risk assets and 30-70% higher risk assets.

GAM Star Balanced LP PLS

Designed for clients seeking a balance of capital protection and participation in equity market growth. The balanced strategy has a significant exposure to global and UK equities which should generate strong returns in the long term. The strategy has a meaningful allocation to government, inflation-linked and corporate bonds for capital protection purposes. The remainder of the holdings are in selected alternative investment funds which target positive returns uncorrelated to broader risk markets and each other.

GAM Star Cautious

LP PLS

Designed for clients seeking a strong focus on capital protection while offering moderate participation in equity market growth. The cautious strategy has a significant exposure to government, inflation-linked and corporate bonds. The portfolio also has a meaningful allocation to selected alternative investment funds which target positive returns uncorrelated to broader risk markets and each other. The remainder of the holdings are in selected global and UK equities.

Important information

Funds

Investment can be made into any of the funds available in the range regardless of the denominated policy currency. It is important to know that unit prices reflect the value of the underlying assets of the funds and so can go down as well as up. Past performance is not indicative of future performance. Where a fund invests in overseas securities, the unit prices may also rise and fall purely on account of exchange rate fluctuations.

RL360 Insurance Company Limited is not responsible for, and will not compensate policyholders in relation to, the performance of their underlying funds. For details of all charges that may affect the individual funds please refer to the specific fund manager's literature.
