

Graduate Actuarial Student

An exciting opportunity has arisen for a Graduate Actuarial Student to join the expanding team at RL360 later this summer.

The main responsibilities of the role include:-

- providing general actuarial support to the RL360 Actuarial function, including helping with data analysis, actuarial valuations, business planning, product pricing and profit testing.
- involvement in the annual valuation process to produce all required regulatory returns
- participation in various projects e.g. product development
- supporting the business with pricing and illustrations
- support our illustration systems, including the specification and testing of new systems
- developing and maintaining actuarial models and experience analyses in Prophet, DCS and Glean

To succeed in an actuarial career you will **need** to have:-

- an excellent academic record, including a minimum of a 2:2 in a mathematical degree or a 2:1 in a non-mathematical degree and strong results in A-Level/Higher Mathematics and English (or equivalent).
- strong problem solving skills
- the ability to work to tight deadlines
- good written and oral communication skills

RL360 can offer you a highly competitive salary and benefits package, an excellent study package with structured support and a culture that will allow you to get the most out of your career.

If you are interested in applying for this position, please send your CV, together with a covering letter to karen.wilson@rl360.com
