

IT Software Analyst / Developer

We're looking for an enthusiastic and motivated person to join the Software Development team of our busy IT department.

As the ideal candidate, you'll be ready to take on the role of analysing and developing solutions for our bespoke corporate systems, as well as supporting both our customers and our staff using the systems.

A team player, you'll be equally comfortable working under your own steam to achieve a common goal.

You'll have a proven track record of experience within the software development environment, a minimum of 5 years in a similar role, preferably (but not essentially) in the life assurance industry, and will possess:

- Strong analytical and problem solving skills with the initiative to proactively resolve issues
- Knowledge and working experience of software design processes and engineering best practices
- Proven technical expertise within development and database design

Ideally, you would also have experience of developing solutions with some of the following packages:

- Microsoft Visual Studio.NET
- Microsoft SQL Server 2008 and above, including any or all of T-SQL, SSIS, SSRS and SSAS
- HTML5, PHP5, CSS and JavaScript
- DBA skills in Microsoft SQL or IBM DB2 environments
- Informatica ETL
- Progress OpenEdge
- Advanced Revelation products, PICK or multi-value programming
- SMART on the IBM iSeries

Your key responsibilities will include:

- Delivering system developments using the appropriate database, and programming technologies
- Supporting and maintaining systems, ensuring their performance, availability and security
- Working within defined time scales and to departmental standards
- Producing clear documentation that meets business needs
- Executing unit tests using appropriate techniques
- Writing and maintaining programming documentation
- Working closely with other teams for resolution of system queries and issues
- Working with project managers to meet project requirements and make accurate estimations

If you'd like to apply, email your CV, plus a covering letter including details of your current remuneration and explaining your suitability for the role, to karen.wilson@rl360.com

Closing date for applications is 25 January 2018
