

IT Systems Analyst / Tester – RL360°

An exciting opportunity has arisen for an enthusiastic and motivated individual in our busy Systems Analysis and Testing team.

As the ideal candidate, you'll be ready to take on the role of analysing and testing software upgrades across our diverse range of systems, as well as supporting staff using these vital systems.

A team player, you'll be equally comfortable working under your own steam to achieve a common goal.

You'll already have worked in a similar role, preferably (but not essentially) in a life assurance environment, and will possess:

- Strong analytical and problem solving skills
- Excellent written and verbal communication skills
- The ability to work to tight deadlines under pressure
- The ability to generate and follow comprehensive test plans

Additional key responsibilities will include:

- Conducting analysis and producing clear documentation, including technical specifications and test documentation
- Identifying and managing test related issues throughout the development lifecycle
- Taking ownership for delivering accurate estimates of time and resources for assigned test phases, including dependencies, risks and assumptions
- Communicating progress against plan for any work packages assigned
- Representing the Systems Analysis and Testing team on corporate projects

If you would like to apply for this position, please send your CV, together with a covering letter, including details of your current remuneration package to Karen.Wilson@rl360.com

Closing date for applications is 23 January 2018.
