based on data provided by third party ESG data providers, the Policy will also include the following clarification in the event that the data provided is considered to be inaccurate or inappropriate: -

In any scenario where a portfolio position is identified as not meeting this exclusion criteria for any reason (legacy holding, transition holding, etc.) the Investment Manager shall be granted 90 days to review or challenge the classification of the issuer if appropriate. 5. Clarifications to all Funds relating to Ancillary Liquid Assets

On 2 November 2021, the CSSF published an update to the FAQ concerning the Law of 17 December 2010 (UCITS), which contained clarifications regarding a UCITS’ permissions to invest in ancillary liquid assets and how these types of assets are defined.

Under the revised definition, ancillary liquid assets should be limited to bank deposits at sight, such as cash held in current accounts with a bank accessible at any time, in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets provided under article 41(1) of the Law of 2010 or for a period of time strictly necessary in case of unfavourable market conditions. The holding of such ancillary liquid assets is limited to 20% of the net assets of a particular Fund.

In response to this, from the Effective Date we will be updating the investment policies in the Prospectus of all Funds to clarify the types of assets which are utilised in unfavourable market conditions, for treasury purposes, and in order to achieve the relevant Fund’s investment objective. The definition of ancillary liquid assets within the Prospectus will also be updated to reflect the revised definition as advised by the CSSF.

There are no changes to the relevant Funds’ risk profiles, portfolio compositions or the way the Funds are managed. The clarifications are consistent with the relevant Funds’ existing investment objectives and policies. You do not need to take any action in response to these clarifications.

6. Reduction of the Securities Lending Usage Levels on all Funds and Update to the Collateral Management Policy for Securities Lending

From the Effective Date, we are reducing the maximum and expected securities lending usage levels for all Funds as currently disclosed in the Prospectus. At present, any Fund which may engage in securities lending is permitted to lend securities up to a maximum of 50% of its net asset value, with an expected level of 30% of the relevant Funds’ net asset value. From the Effective Date, the maximum permitted level will be reduced to 30% of the relevant Funds’ net asset value, and the expected level will be reduced to 20% of the relevant Funds’ net asset value.

In addition, we will also be updating the collateral management policy for securities lending, as stated in the Prospectus, to the clarify the types of collateral the Funds can receive when securities lending. Please see below for further details of the changes:

Appendix 1
Clarifications to certain Funds relating to investments into Special Purpose Acquisition Companies

From the Effective Date, the Prospectus will be updated to clarify that certain Funds may invest up to 10% of the Fund's net asset value in Special Purpose Acquisition Companies (SPACs) that qualify as Transferable Securities.

A SPAC is a company with no prior operating history or commercial operations and is formed strictly to raise capital through an initial public offering (IPO) to buy another company. At the time of the IPO, a SPAC has no existing business operations or stated targets for acquisition.

The life cycle of a SPAC is typically divided into three stages:

Stage One - The IPO, whereby the units or shares and warrants in the SPAC are admitted to trading on a trading venue.

Stage Two - The SPAC searches for a target company to acquire (usually within 12-24 months).

Stage Three - The final stage consists of the business combination (de-SPAC transaction) with the target company, typically through a merger. After the third stage, the SPAC is a normal listed company.

Under the CSSF regulations, whilst SPACs are not prohibited, they have specific risks associated with their investment (see "**Specific risks relating to Funds investing in SPACs**" below). As such, all Funds regulated by the CSSF are limited to a maximum of 10% of the relevant Fund's NAV, provided that such SPAC investments fulfil all applicable eligibility requirements, are appropriately disclosed in the Prospectus, and are captured adequately by the Company's risk management processes.

Specific risks relating to Funds investing in SPACs

Dilution risk: Due to the structure of a SPAC there is inherent risk that the relevant Fund's level of ownership may drop significantly due to a number of factors.

Lack of transparency: The level of transparency provided in disclosures to SPAC investors is limited as the SPAC has no operations or history, therefore there is no historical financial information available, and the risk factors are typically limited and generic in nature, particularly where the acquisition strategy is more broadly defined.

As a result of the lack of transparency, it might not be clear whether the sponsors are unproportionally or unfairly compensated, from the funds collected from the investors in SPACs. It might also be hard to estimate if the costs of underwriting fees are borne fairly by SPAC redeeming investors and remaining investors.

Conflicts of interest risks: Due to limited transparency associated with SPACs and the role of the sponsors in finding the target company, conflicts of interest may occur.

Valuation risk: Since the objective of SPAC is to invest in a business which was not listed before, it might be hard to estimate the real value and potential performance of the target company.

Liquidity risk: Due to the lack of tangible underlying assets and/ or underlying assets without proven track record in stock exchanges, it might be hard to sell the shares in SPAC at a desired time without incurring in any losses in price. (please also refer to the 'Valuation risk' section, here above). It may also be the case that a SPAC imposes a redemption limit.

Janus Henderson Horizon Fund

2 Rue de Bitbourg, L-1273 Luxembourg, Grand Duchy of Luxembourg
W janushenderson.com

Escrow account risk: At the IPO stage, SPACs collect financing from the investors without any tangible underlying investments, until certain period in time when the proper target investment is found. Therefore, there might be a risk related to the creditworthiness of the institution where the funds are deposited, as well as possible reinvestment of the proceeds of the offering until the target company is acquired.

Fund Risk Profile: Once the shares of the SPAC are acquired, the SPAC might be in a funding stage (stage one) without any underlying tangible investment. Analysis will be conducted prior to the relevant Fund's investment in the SPAC and on an ongoing basis according to the relevant laws and regulations in order to identify the SPAC's risk profile, its structure and its eligibility for investment in the relevant Fund. The risk impact of the underlying investments on the relevant Fund's risk and reward profile is assessed as part of the ongoing risk analysis. However, it may be more complex to do so compared to other transferable securities.

This change is consistent with the Fund's overall investment strategy and will not result in any material change to the Fund's risk profile. There will be no material change in the operation and/or manner in which the Fund being managed. There will not be material adverse impact on the rights or interests of the shareholders of the Fund. There are no new fees, charges or increases in existing fees or charges borne by the Fund because of this change.

Please see "Options Available to You" for details on how to respond to these changes.

Dear Shareholder

We are writing to inform you of a restructuring of the Depositary and Administrator to the Company which is summarised below and will be effective on 1 October 2022 (the “**Effective Date**”).

BNP Paribas Securities Services, Luxembourg Branch (“**BPSS - Luxembourg**”) is currently appointed as Depositary and Administrator of the Company. We hereby inform you that from the Effective Date, BPSS - Luxembourg will cease to exist and BNP Paribas, Luxembourg Branch (“**BNP - Luxembourg**”), as legal successor of BPSS - Luxembourg, will continue to act as Depositary and Administrator of the Company.

Background

This change is as a result of a proposed intragroup merger between BNP Paribas Securities Services S.C.A and its parent company BNP Paribas on the Effective Date, all of the activities of BNP Paribas Securities Services S.C.A will be transferred to BNP Paribas and BNP Paribas will assume all the functions and services entrusted to BNP Paribas Securities Services S.C.A and its branches (the “**Merger**”). In the Grand Duchy of Luxembourg, the Merger will be materialized by the absorption of BPSS - Luxembourg by BNP - Luxembourg.

The Commission de Surveillance du Secteur Financier (“**CSSF**”) has been notified of the Merger. BNP - Luxembourg is authorised by the CSSF to act as a depositary and fund administrator for Luxembourg undertakings for collective investment. The CSSF has no objection to BNP - Luxembourg assuming the role of Depositary and Administrator of the Company as a result of the abovementioned Merger.

We will notify you separately if there is any change in the Effective Date or any other material changes to the Merger.

How does this impact you?

From a practical point of view, this Merger and the thereto related change of entity acting as Depositary and Administrator for the Company (i.e. from BPSS - Luxembourg to BNP - Luxembourg) will not impact you. It does not affect the commitments between BPSS - Luxembourg and the Company as these duties and obligations are fully taken over by BNP – Luxembourg on the Effective Date. The address and contact details of the Depositary and Administrator will remain the same, and the personnel, functions and internal control measures of BNP - Luxembourg will be substantially the same as those of BPSS - Luxembourg currently.
