II. SUSTAINABLE TRANSFORMATION

“Sustainable investment policy”

Please note that your Company will be fully ESG integrated and all sub-funds will comply with the sustainable investment policy as set in the Book 1 of the prospectus as described below:

The Sustainable Investment Policy describes the integration of ESG Analysis and/or ESG Standards (as defined below) into the investment processes applied by the investment managers of each sub-fund. ESG stands for Environmental, Social and Governance; these are three groups of indicators commonly used to assess the level of sustainability of an investment. BNP PARIBAS ASSET MANAGEMENT is committed to have a sustainable approach to its investments. Nonetheless, the extent to which these Standards and Analysis can be applied varies according to the type of sub-fund, asset class, region and instrument used. Furthermore, some sub-funds may apply additional investment guidelines, as described in the Book 2. Consequently, the implementation of this policy will be applied individually across all portfolios.

ESG Standards are integrated in the investment process of each sub-fund. The Standards include respecting: 1) the 10 principles of the UN Nation Global Compact and 2) the BNP PARIBAS ASSET MANAGEMENT sector policies.

The United Nations Global Compact (www.unglobalcompact.org) is a shared framework, recognized worldwide and applicable to all industry sectors. It relies on international conventions in the areas of human rights, labour standards, environmental stewardship and anti-corruption. Those companies that violate one or more of the principles are excluded from the sub-funds’ investments, and those at risk of breaching them are closely monitored, and may also be excluded.

BNP PARIBAS ASSET MANAGEMENT has also defined a series of ESG guidelines relating to investments in sensitive sectors. Companies from these sensitive sectors that do not comply with the minimum principles specified in these guidelines are excluded from the sub-funds’ investments. The sectors concerned include, but are not limited to, palm oil, wood pulp, mining activities, oil sands, tar sands, nuclear, coal-fired power generation, tobacco, controversial weapons and asbestos.

These ESG Standards are communicated to Investment Managers by the Sustainability Centre of BNP PARIBAS ASSET MANAGEMENT.

The ESG Analysis involves the evaluation of the above three non-financial indicators:

- *Environmental: such as energy efficiency, reduction of emissions of greenhouse gases, treatment of waste;*
- *Social: such as respect of human rights and workers’ rights, human resources management (workers’ health and safety, diversity);*
- *Governance: such as Board of Directors independence, managers’ remuneration, respect of minority shareholders rights.*

The way in and the extent to which ESG Analysis, such as ESG scores, is integrated in each investment process is determined by the Investment Manager for each investment process.

Stewardship is an integral and crucial part of sustainable investment, which shall be used to influence companies and the world towards the right path. In this scope, BNP PARIBAS ASSET MANAGEMENT engages on three different dimensions:

- *Company Engagement: the aim is to encourage companies to obtain the highest possible standards of environmental, social and governance responsibility, and to accompany them in this respect.*
- *Voting-Related Engagement: voting at General Meetings is a key component of the Group’s ongoing dialogue with companies and forms an integral part of its investment process.*
- *Public Policy Engagement: BNP PARIBAS ASSET MANAGEMENT believes that companies can benefit from the engagement with policy makers on the development of a regulatory framework that encourages them to achieve high environmental and social standards.*

More information and documents on BNP PARIBAS ASSET MANAGEMENT global sustainability strategy may be found on the website at the following address: <https://www.bnpparibas-am.com/en/our-approach-to-responsibility/as-a-responsible-investor/>.

“ESG integration”

Each sub-fund will follow the standard ESG investment criteria as defined above.

Additional specific ESG requirements shall apply to the strategies below:

1. Multi-Factor strategies

These strategies will apply to the sub-funds **Germany Multi-Factor Equity** (ex “Equity Germany”), **Euro Multi-Factor Corporate Bond** (ex “QIS Multi-Factor Credit Euro IG”), **US Value Multi-Factor Equity** (ex “Equity USA Value DEFI”) and **US Multi-Factor Corporate Bond**.

Within these sub-funds, once the quantitative investment process is implemented, a scoring related to ESG and Low Carbon (with the exception of *Euro Multi-Factor Corporate Bond* and *US Multi-Factor Corporate Bond* for which there is no carbon footprint enhancement) is calculated for each individual stocks of the investment universe. The portfolio is then fully rebalanced with the objective to select the best equities available in order to maximize its final average score on these criteria

2. Thematic strategies

The sub-funds (**Aqua, Climate Impact, Energy Transition** (ex “Energy Innovators”), **Global Environment, Green Bond, Green Tigers, Human Development** and **SMaRT Food**) will aim at helping or accelerating the transition into a sustainable world by focusing on challenges related to their specific theme of investment.

3. “Best-in-Class” strategies

The sub-funds to be involved in these strategies (**Sustainable Euro Bond** (ex “Sustainable Bond Euro”), **Sustainable Euro Corporate Bond** (ex “Sustainable Bond Euro Corporate”) and **Sustainable Global Corporate Bond** (ex “Sustainable Bond World Corporate”)) are classified as “Best-in-Class” from an ESG standpoint. It means that they select issuers whose practices are considered as the Best in their Class on this topic. In addition, these sub-funds will select issuers whose products and services (i) contribute to resolving problems linked to environment and sustainable development, and (ii) will have positive and sustainable impacts on the environment and social climate.

The Investment universe of these sub funds will be provided by the Sustainability Centre of BNP PARIBAS ASSET MANAGEMENT. This universe will be based on the ESG scoring process. This process has three key steps:

- 1) a quantitative ESG score for each issuer /country is calculated based on ESG indicators,
- 2) then, qualitative elements linked to the key sustainable issues may be considered. This process may modify the initial score.
- 3) the new ESG score is converted into a ranking which leads the following recommendations:
 - Issuers having a good score : Positive recommendation
 - Issuers having a medium score : Neutral recommendation
 - issuers having a poor score : Negative recommendation

The Investment Manager may only invest in issuers having a Positive and or Neutral recommendation.
